PROJECT P²ECE: PREPARING PARAPROFESSIONALS
FOR EARLY CHILDHOOD EDUCATION

ECE 205: Nutrition, Health, and Safety

Bank of Resources
This Bank of Resources was developed under Project P2ECE (Award# H325N110018) funded by the U.S. Department of Education, Office of Special Education Programs. Project P2ECE is collaboration between the PAR2A Center of the University of Colorado Denver, the University of Northern Colorado and the Early Childhood Education programs at Colorado Community College System.

Acknowledgements

The Preparing Paraprofessionals for Early Childhood Education project (Project P²ECE) is funded by the Office of Special Education, U.S. Department of Education. Project P²ECE is a partnership between the Paraprofessional Resource and Research (PAR²A) Center at the University of Colorado Denver, University of Northern Colorado, and the ECE Statewide Community College Faculty Coalition. The project addresses the critical need for well-prepared professionals who are equipped with knowledge and skills to provide instructional support to children in a variety of preschool settings, including local school districts, Head Start, and community-based preschool programs for 3- to 5-year-olds.

An expert panel reviewed and adapted course competencies addressed in existing ECE-related certificate coursework and Associates of Arts programs in various community colleges in Colorado, by incorporating standard-based and evidence-based special education content and practices. After extensive review, the expert panel provided their recommendations for the ECE 205: Nutrition, Health, and Safety course syllabus, course outline and resources, which were later collated as the ECE 205: Recommended Syllabus & Bank of Resources booklet. This booklet addresses all of the course competencies by providing relevant resources for ice breakers, readings, assignments/assessments, websites, and video clips.

We would like to acknowledge the ECE professionals who supported the development of this booklet through their input and guidance. We appreciate their invaluable assistance in reviewing the recommended syllabus for the ECE205 course, and contributing resources to address each competency. We express our gratitude to the following members of the expert panel and community college faculty members:

- Linda Forrest, University of Northern Colorado
- Susan Hill, Arapahoe Community College

We also like to thank the following individuals for their efforts in bringing the ECE 101: Recommended Syllabus & Bank of Resources to its current form:

- Rashida Banerjee, University of Northern Colorado
- Ritu V. Chopra, University of Colorado Denver
- Namita A. Mehta, University of Colorado Denver
- Geraldine I. DiPalma, University of Colorado Denver
- Cathy Smyth, University of Northern Colorado

We would also like to place on record our appreciation for the invaluable support rendered by the members of the ECE Statewide Community College Faculty Coalition for endorsing and helping the effort to make the recommendations a part of the statewide common core syllabus.
Introduction to the Bank of Resources

The following document provides a Bank of Resources (BoR) for instructors who are teaching the course *ECE 205 – Health, Nutrition, and Safety* at the Colorado Community College. The course focuses on nutrition, health and safety as a key factor for optimal growth and development of young children. This course includes nutrient knowledge, menu planning, health practices, management and safety, and communicating with families.

**What is BoR?**

The BoR booklet provides a menu of teaching resources for instructors to use in their college teaching. The content is specifically designed to include evidence-based resources to prepare early childhood professionals for inclusive classrooms that serve all children, including those with identified disabilities.

Each BoR booklet focuses on particular course content and includes the following:
1. A syllabus template for instructors
2. A matrix with the resources, and
3. Appendix with examples of assignments

Developed through multiple iterations and field input, the matrix with resources is arranged in columns that include (a) reading materials, (b) icebreakers and assignments, (c) websites, and (d) videos. These resources are arranged in rows according to the competencies stated for each course in the Colorado Community College Common Course Numbering System (CCCNS).

**Who can use BoR?**

While the booklet was designed with Colorado Community College faculty who teach in early childhood programs in mind, the content can easily be used by instructors in other programs and by professional development providers who are seeking resources to enhance their teaching and professional development materials.

**How do I use BoR?**

We recommend that instructors print out the document and review the document prior to developing the course syllabus. Instructors can then select specific resources for their courses based on their individual course goals, course format, and student needs. Since the BoRs are presented by competencies, the instructors may need to align the resources with their course schedules. For example, instructors may decide that the competency C in the BoR relates to the topics for Units 3 and 7. Thus, when planning for Units 3 or 7, the instructors will review the resources provided in Competency C and select those that they want to include in their teaching.
ECE 205: Health, Nutrition, and Safety
Recommended Syllabus & Bank of Resources
**Course Title (short): Nutrition, Health, and Safety**

**Course Title (long): Nutrition, Health, and Safety**

**Minimum Credit:** 3

**Maximum Credit:**

**Status Notes:** Prefix change, Course title change

**Origin Notes:** ACC

**Section:**

**Location:**

---

**COURSE DESCRIPTION**

Focuses on nutrition, health and safety as a key factor for optimal growth and development of young children. Includes nutrient knowledge, menu planning, food program participation, health practices, management and safety, appropriate activities and communication with families. Addresses ages from prenatal through age 8.

---

**COURSE COMPETENCIES & OBJECTIVES**

A. Identify nutritional components, diet modifications, physical activity needs and skills of each stage of child development.

B. Use food guides and standards to prepare and evaluate menus that support individualized healthy growth and development for all children.

C. Identify rules, regulations and best practices as they pertain to essential nutrition, health and safety standards for all infants and children.

D. Identify and describe the health, safety and nutrition roles of local, state, and national agencies for licensed child care.

E. Demonstrate the ability to identify current and reliable informational resources that assist programs and families to support optimal health, safety, and nutrition practices.

F. Assess the effectiveness of current nutrition, health and safety policies, procedures and practices that meet the needs of all children within licensed child care programs.

G. Design and demonstrate a learning activity in health, safety and nutrition that encourages child independence and knowledge about healthy living.

H. Examine the importance of family/program partnerships that are responsive to diverse health, nutritional, developmental and cultural needs.

I. Describe practices within the learning environment to reduce the risk of preventable injuries and emergencies, inclusive of disaster preparedness.

J. Identify infection control practices and illness guidelines in collaboration with program, family, and community health resources.

K. Use technology to identify resources at the local, state and national level

---

**TOPICAL OUTLINE**

A. Introduction to nutrition, health, and safety
   a. Definition
   b. Historical perspectives
c. Identification of reliable resources
d. Socio-cultural implications

B. Nutrients and their functions
   a. Basic nutrients
   b. Sources
   c. Essential functions

C. Food guides and standards
   a. My food pyramid
   b. Food labels

D. Child and Adult Food Care Program – CAFCP

E. Developmental guidelines for food
   a. Prenatal through age 8
   b. Menu planning
   c. Food program requirements
   d. Special diets
   e. Evaluation
   f. Cost analysis

F. Health
   a. Promoting good health
      i. Health practices and records
      ii. Assessing health status
      iii. Staff wellness
   b. Infection control
      i. Identification
      ii. Immunizations
      iii. Universal precautions
      iv. Medication administration

G. Safety
   a. Managing a safe environment
   b. Policies and procedures
   c. Injury prevention
   d. Safety plans

H. Emergency plans and procedures
   a. Weather-related
   b. Human caused
   c. Drills
   d. Disaster preparedness
      i. Policy
      ii. Practice communication connections
         1. Colorado Office of Emergency Management
         2. Local disaster managers

I. Indoor safety
   a. Poison control
   b. Equipment
   c. Fire

J. Outdoor safety
a. Playgrounds  
b. Traffic and transportation  
c. Water safety  

K. Personal safety  
a. Child abuse  
   i. Reporting  
   ii. Resources  

L. Management and safety  
a. Regulatory agencies  
b. Sanitation  
c. Maintenance  
d. Center policies  
e. Personnel  

M. Curriculum  
a. Concepts  
b. Activities  

N. Partnerships  
a. Families  
b. Community  

O. Resources and Information  
a. National, state, and local agencies  
b. Online resources and research  

---

PARAPROFESSIONAL STANDARDS ADDRESSED
1. ECP5S1: Collaboration with families and early childhood professionals to implement basic health, nutrition and safety practices and procedures for young children.  
2. ECP5S2: Universal precautions to assist in maintaining a safe, healthy learning environment for young children and their families.  
3. EIP8S1: Record of information in various formats.  
4. ECP9S3: Welfare and safety of young children at all times.  

ASSIGNMENTS & ASSESSMENT OF ASSIGNMENTS  
Faculty will list the required assignments for this course and include rubrics, grading sheets, checklist, etc., that accompany each assignment. See Bank of Resources for suggestions.  

1.  
2.  
3.  
4.  

GRADING  
In order to receive a course grade as indicated relative to the point distribution, all required activities and projects must be completed.  

94% to 100% – A  
90% to 93% – A-
87% to 89% – B+
83% to 86% – B
80% to 82% – B-
75% to 79% – C
74 and below – F

**COURSE OUTLINE**

Faculty will list the schedule of topics/requirements in this area. See Bank of Resources for suggestions.

**SUDENT ETHICS & POLICY INFORMATION**

*Each community college must include policies regarding incomplete process, academic honesty, access, disability, communication, etc.*
# Bank of Resources

The following table outlines possible readings, ice breakers and assignments, websites, and video clips that can be used for each competency in the course. 

*Note: Some longer and more detailed assignments are hyperlinked and available in the Appendices.*

## Competency A: Nutritional components, diet modifications, physical activity needs, and skills of each stage of child development.

Selected Examples of Assignments
Design a day in an early childhood classroom (any age from birth to age 8) that integrates nutrition, safety, and physical activity.

How did you integrate nutrition into the classroom? How did you involve the children? How did you teach children about nutrition? Did you integrate families or the community?

What safety procedures did you enforce? How did you teach children about these procedures?

What methods did you use to increase the physical activity of the children in your classroom? Did you just do physical activity during recess or did you integrate it into other routines?

In order to implement your design, how would you collaborate with families, your administrator and other adults in the program?
Competency A: Nutritional components, diet modifications, physical activity needs and skills of each stage of child development
Assignment A4: Menu Planning and Cost Worksheet

Part 1: Using this guide, plan one week (Monday-Friday) of meals for a center. The meal plan should include breakfast, lunch, and snack. You can use a template such as the one below:

<table>
<thead>
<tr>
<th></th>
<th>Monday</th>
<th>Tuesday</th>
<th>Wednesday</th>
<th>Thursday</th>
<th>Friday</th>
</tr>
</thead>
<tbody>
<tr>
<td>Breakfast</td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Lunch</td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Snack</td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Part 2: Cost out the meals developed in the meal plan above.
Competency B: Food guides and standards to prepare and evaluate menus that support individualized healthy growth and development for all children.

Assignment B2: Child Observation

Observe a child eating and consider the following questions:

What foods does the child eat? Why do you think that is?

What foods are refused? Why do you think that is?

Using the food guides & standards, is this child developing good eating habits?

Do the adults’ food likes and dislikes have any influence on what the child eats?

Does the child’s disability or specific needs have any influence on what the child eats?

Based on the food guidelines, what recommendations do you have?
Competency C: Rules, regulations and best practices as they pertain to essential nutrition, health and safety standards for all infants and children
Assignment C2: Child Health Promotion

The new Colorado Shines QRIS allots 14 points for child health promotion. The design guide is available at:

http://media.wix.com/ugd/97dde5_c99eb944c87f48639476ecb766f76e5b.pdf

Brainstorm ideas for child health promotion. What health topics would you include? How would you specifically support children with special needs and their families?
Competency D: Best practices and state standards for health, safety, and nutrition for young children in early childhood setting.
Assignment D1: Integrating Health and Fitness into the Young Child’s Day

How would you integrate best practices and state standards for health, nutrition, and safety into a child’s day? What topics would you cover? What techniques would you use? How would you ensure to include children with special needs?

Mealtimes (Breakfast, Lunch, Snack)

Free Play

Centers (art activities, water play, etc.)

Outside Time

Circle Time
Competency E: Current and reliable information resources that assist programs and families to support optimal health, safety and nutrition
Assignment E2: Resource File

Part 1: Visit the following online resources:

ChooseMyPlate.gov http://www.choosemyplate.gov/

NIH http://www.nih.gov/

Colorado Shines http://coloradoshines.force.com/ColoradoShines

Colorado Office of Early Childhood http://www.coloradoofficeofearlychildhood.com/

Part 2: Find four more resources that you can add to your resource file for programs and families to support health, nutrition, and safety with young children.
Competency F: Assessment of the effectiveness of current nutrition, health and safety policies, procedures and practices that meet the needs of all children within licensed child care programs

Assignment F2: Daily Health Check

Conduct a daily health check using the checklist available at:

http://www.healthychildcarenc.org/PDFs/daily_health_check.pdf

What do you see as the purpose of doing such a regular health check?

Are there things you would adjust in this checklist to make it more inclusive of children with disabilities?

What other initiatives would you implement to continually check the health of the children in your classroom? How would you work with families?
Competency G: Learning activities in health, safety and nutrition that encourage child independence and knowledge about healthy living.

Assignment G3: Agency List

Develop a list of local, state, and national agencies that promote health, nutrition, and safety to share with families and providers.

- What types of accommodations might be needed for children with significant physical needs that cannot eat by themselves?
- List rules and regulations that relate to nutrition, health and safety standards for young children. With adult guidance, if needed, have the children in groups of three design and demonstrate a learning activity that encourages child independence and knowledge of healthy living. Teacher guidance may be needed with this activity.
Competency H: Family/program partnerships that are responsive to diverse health, nutrition, developmental and cultural needs.

Assignment H2: Resource File

Develop a list of available resources in your state and local community for children who have vision and/or hearing impairments, speech problems, autism, cerebral palsy and learning disabilities. How might each of these conditions impact the child’s nutrition, safety, and development?

Name state, local and national agencies that support quality child care in Colorado
Competency I: Professionalism in Early Childhood Education
Icebreaker I1: Daily Health Check

Describe the daily health check routine. What are some of the common health problems/conditions teachers should be looking for?

Communicable illness
Develops in predictable stages: incubation, prodromal (first nonspecific signs of illness, acute and convalescence).

Perform a daily health observation on each child. Demonstrate to families how they can become involved with the health appraisal process. Become familiar with the health observation checklist.
Competency J: Infection control practices and illness guidelines in collaboration with program, family and community resources.
Assignment J2: Infection Control Plan

Create an infection control plan that works with the program, families, and community.

How would you promote infection control in your classroom and program?

How would you partner with families and use community resources to implement infection control?
Competency K: Technology to identify resources at the local, state and national level.
Assignment K2: How to Use Technology to Promote Health and Wellness

How would you use technology to support nutrition education?

How would you use technology to promote health and physical activity?

How would you use technology to teach indoor and outdoor safety?
